

## *Full Skin Exam*

### ***What is it and do I need one?***

Both the American Academy of Dermatology and the American Cancer Society recommend an annual Full Skin Exam for all patients over age 40. If you have certain risk factors, such as extensive sun (or tanning bed) exposure, a history of two or more severe (blistering) sunburns, a precancerous skin growth, a family or personal history of skin cancer, or numerous moles, you should start your screening earlier. A Full Skin Exam involves inspection of the entire skin surface by your dermatologist.

\_\_\_\_\_ Yes, I would like to schedule a Full Skin Exam.

\_\_\_\_\_ No, thank you, I do not care to schedule a Full Skin Exam.
